Control Boxes

letra

Our PTS, SAR, and AZL Series Positioners use LCB30 Series control boxes with Standard and Enhanced Models.

Standard Models are included in the positioner package. Enhanced models are optional and sold separately. Enhanced versions are supplied with the built-in computer having a 10 inch touchscreen to run positioners' control software. This model also allows users to connect a separate PC by a USB port. With this feature, users can bypass the built-in computer in the control box.

Please also note that all the models are suitable for 19inch rack mounts.

APPLICATIONS
Letra PTS, SAR, and AZL Series Positioners

KEY FEATURES
